Question		Answer
1	See item B – Product Technical Specifications – on page 7. Is the 20” inch monitor configuration a minimum requirement, can we go over that configuration? Can it be a larger monitor than the 20” inch?	Yes, it can be a larger monitor as long as you meet this or above. For clarification, the monitor could be higher as long as all the other specifications are met, such as the swivel, the tilt and height control. 20” inches is the minimum requirement; prices change if the monitor size gets higher.
